

Continuous motion

Spec	
MOC	Stainless Steel SS304
Machine speed	200 Cartons/min
Servo Motor	2 KW
Power consumption	2.5kw
air pressure	6 bar
weight	1900kg
adjustable height	150mm

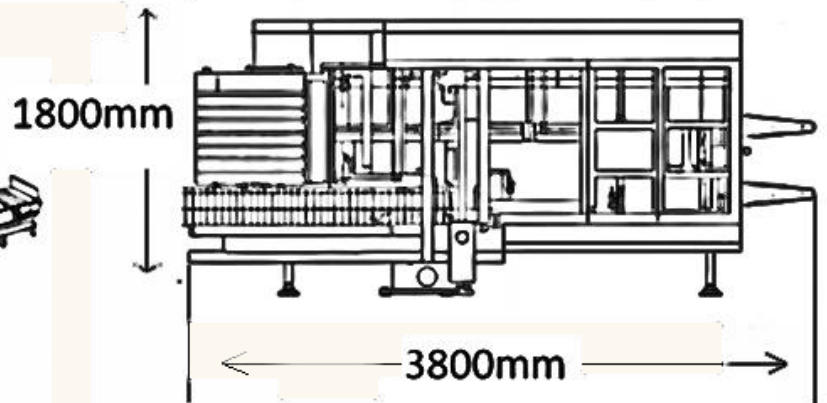

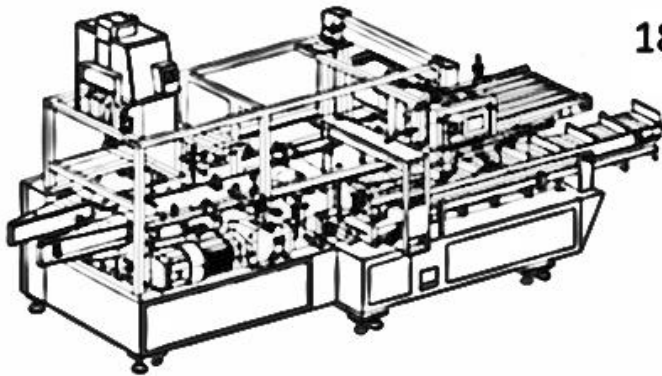

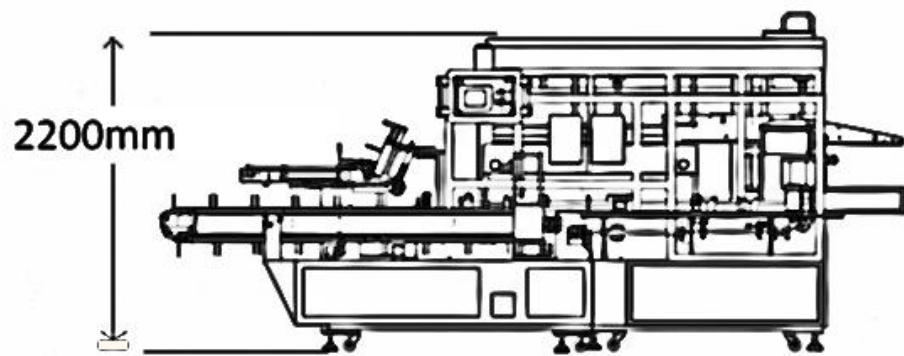

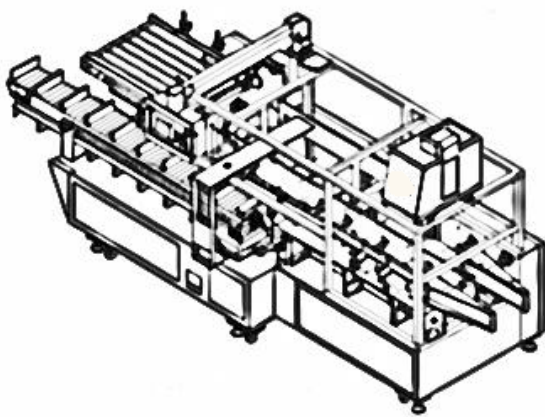

Size Range	min	max
Width	25mm	200mm
Height	20mm	150mm
Length	60mm	250mm

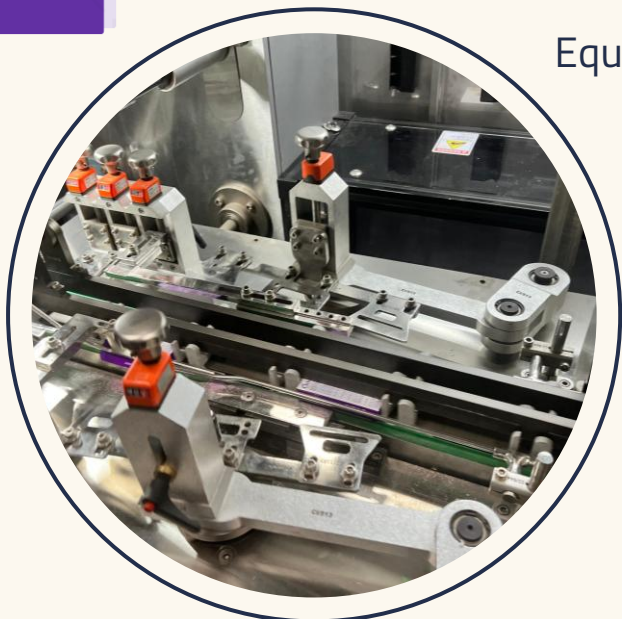

The **High-Speed Automatic Cartoning Machine** is designed for applications across food, pharmaceuticals, cosmetics, and consumer goods. Operating in continuous motion with a servo-driven system, it delivers speeds of **100–200 cartons per minute**.

The machine automatically opens cartons, inserts products, and seals them using either tuck-in closure or hot-melt glue. It can also be seamlessly integrated with upstream equipment such as **pillow packaging machines, VFFS machines, and shrink-wrappers** to form a fully automated packaging line.

Layout

Equipped with world-renowned electrical components, the system ensures **high productivity, reliability, and consistent performance.**

Our presence in three countries
