

Palletizer P20S

A heavy-duty 4-axis palletizing robot automatically stacks cartons, trays, or cases from the infeed conveyor onto pallets with perfect precision and stability. Designed for food, beverage, FMCG, and industrial packaging lines.

Key Advantages

- **High throughput:** Handles 6-8 picks/min (format-dependent) for up to 600 cycles/hour.
- **Flexible pallet patterns:** Stores and recalls over 100 stacking recipes via HMI.
- **Minimal downtime:** Quick recipe changeovers without mechanical adjustments.
- **Durable :** Vacuum or clamp gripper options handle cartons, shrink-wrapped bundles, trays, and open-top boxes.
- **Safe operation:** Fully enclosed cell with safety fencing, interlocks, and light curtains.
